# aiTAAS Edge Architecture for Test Center

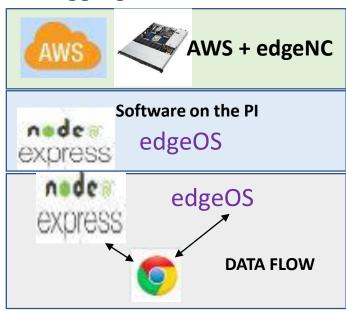

#### **BOT Framework**

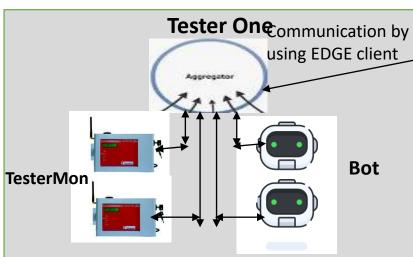

### **TesterMon Framework**

## **Aggregator & Tester**

#### **Test Center Server**

**TesterMon:** report sensors values to Aggregator **BOT:**reports status and receive tasks from aggregator **Aggregator:** 

- Registers it's IP with Tester Server
- Receives sensors data from testers
- Create and assign tasks to Bots when a sensor value Goes below the threshold

**Tester Server:** Monitor and display status of the aggregator for each tester
